Login With Wrong Password	Chrome	86.0.4240.198			Passed

Step #	Description	Comment	Duration	Result
1	Press Keys: ('test@testproject.io,')			Passed

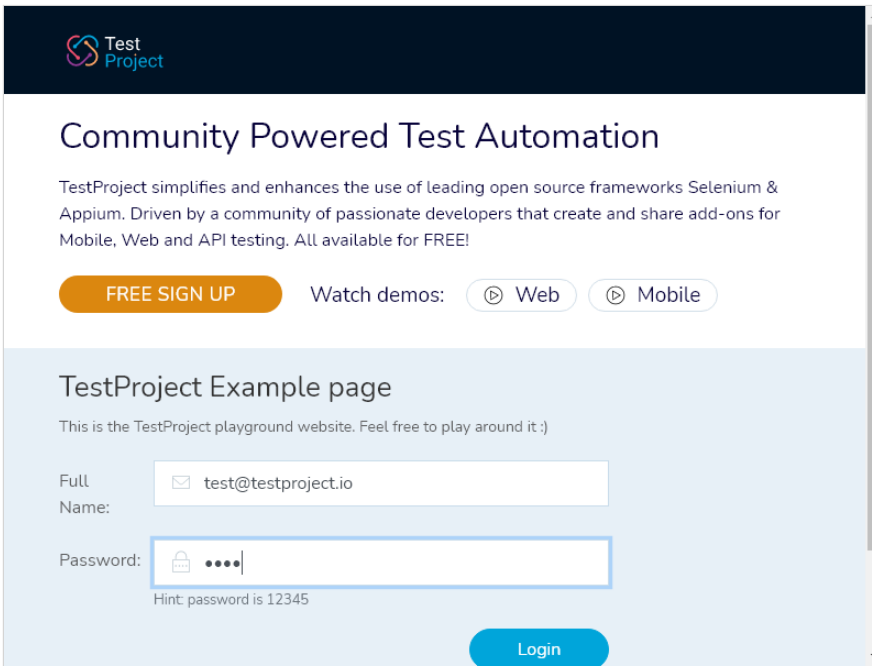

Metadata: [Message]: Keys pressed: "('test@testproject.io,')" on element found at "css:#name",

2 Input Text: 1234

Passed

Metadata: [Message]: Typed 1234 to css:#password,

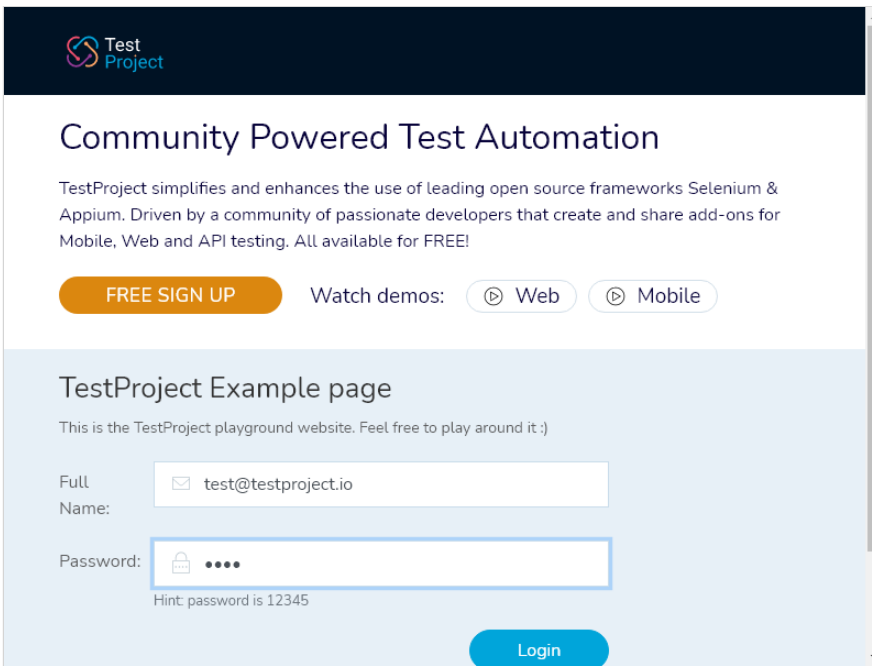

The screenshot shows the TestProject website. At the top, there is a dark blue header with the TestProject logo. Below the header, the main heading is "Community Powered Test Automation". Underneath, there is a paragraph of text: "TestProject simplifies and enhances the use of leading open source frameworks Selenium & Appium. Driven by a community of passionate developers that create and share add-ons for Mobile, Web and API testing. All available for FREE!". There are two buttons: "FREE SIGN UP" (orange) and "Watch demos:" followed by "Web" and "Mobile" (play icons in circles). Below this is a section titled "TestProject Example page" with the text "This is the TestProject playground website. Feel free to play around it :)". There is a form with two fields: "Full Name:" with the value "test@testproject.io" and "Password:" with the value "1234" (masked with dots). A hint below the password field says "Hint: password is 12345". A blue "Login" button is at the bottom right of the form.

3 Get Value: css:#password

Passed

Metadata: [Message]: value: '1234',

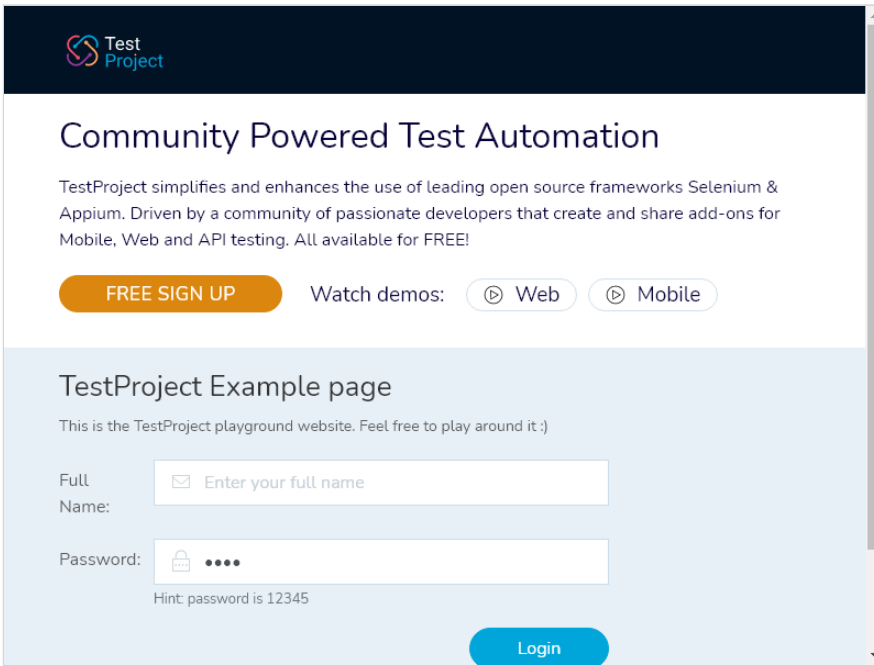

This screenshot is identical to the one above, showing the TestProject website with the login form. The password field contains the value "1234" and the hint "Hint: password is 12345" is visible below it.
